

Technical Data Sheet

Revision Date: 2017-07-01
Name: WANAMINE™ MDA-100

NO. PCS_1001
Version: 4.0

Application

WANAMINE™ MDA-100 is pure Diaminodiphenyl Methane (MDA) and contains at least 99% of 4,4'-MDA and few of 2,4'-MDA. Molecular weight is 198.26, it varies from white to yellowish crystal color at room temperature.

WANAMINE™ MDA-100 product is an important chemical industry intermediate. Besides being used in producing MDI and HMDI, it is widely used in PI, PEI, epoxy resin hardener, bismaleimide resin, chain extender of PU elastomer etc. The products synthesized with it have excellent properties of mechanics, electrical-insulation, heat-resisting, radiation-resisting and abrasion-resisting.

Specification

Test Item(s)	Specification(s)	Unit	Test Method(s)
Appearance	White or yellowish crystal	--	Visual
Melting Point	≥87.0	°C	Automatic melting point apparatus
2,4'-MDA	≤1.0	%(A/A)	GC
4,4'-MDA	≥99.0	%(A/A)	GC

Package(s)

Plastic lined paper bags, 25kg/bag

Flexible containers, 300kg/bag or 500kg/bag ISO-TANK

Storage

WANAMINE™ MDA-100 should be kept in dry, clean warehouse with well ventilation. Avoid exposing to light and heating for prevention from oxidation. Protect the product from leakage, rain and insolation during transportation.

Shelf Life

The shelf life of WANAMINE™ MDA-100 is 12 months under recommended storage conditions. The product stored past expiration may still be used if the analysis results so indicate.

For more information about safety and environment, please refer to our MSDS or contact our customer service center.

Version information:

Date of first issue: June 6, 2005

Date of 1st revise: May 5, 2015. Reason for revision: A change of company address

Date of 2nd revise: August 17, 2015. Reason for revision: Change with standard template from our company.

Date of 3rd revise: July 1, 2017. Reason for revision: Change of company LOGO
