

## Announcement of Resumption of NPG Equipment in Yantai Industrial Park

The Board of Directors and all the directors of the Company undertake that the information in this announcement contains no false records, misleading statements or material omissions, and they are jointly and severally liable for the veracity, accuracy, and integrity of the content hereof.

The NPG device (40 thousand tons / year) in Wanhua Chemical Yantai Industrial Park has been in the shutdown since August 15 because of the influence of the utilities and catalyst replacement.

Up to now, the NPG equipment has recovered normal production.
