Antkote® 2043

Hydroxyfunctional polyacrylic dispersion

Technical Data Sheet

Name: Antkote® 2043
Revision Date: 2018-05-09

Product Description

Antkote® 2043 is a hydroxyfunctional polyacrylic dispersion designed for general industrial baking coating. In combination with amino resins or blocked polyisocyanates, it can be used for high-performance waterborne baking coating. It also can be used for waterborne two-component coating with polyisocyanates or other crosslinkers. Approx. 44% in water/solvent naphtha 100/1-butoxy-2-propanol, approx. 46:4:4. Neutralizing agent, N,N-dimethyl ethanolamine(<2wt%), bound as a salt.

Properties

1. Excellent flexibility.
2. High gloss, gloss (60°) > 85%.
3. Excellent resistance to chemicals.
4. Excellent weather resistance.

Storage

The product should be stored in dry conditions above 5°C and below 35°C with the integrity of the packaging, and prevent direct sunlight. The validity of this product is for 6 months, performance assessment is recommended before use after shelf life. The product should be protected from freezing during storage. It is suggested to filter before application and use up once the package is open.
Antkote® 2043

The viscosity of the product is largely governed by the pH. As the pH may decrease during storage, a decrease in viscosity is also to be expected. The viscosity can be adjusted to its original value by the addition of small amounts of an aqueous 10% solution of N,N-dimethyl ethanolamine.

Disclaimer: Wanhua Chemical Group Co., LTD. recommends that any customers of this material should check with Materials Safety Data Sheet (MSDS) for details about safely handling this material. We also suggest that you contact the suppliers of any other materials used in our recommended formulations and suggestions for appropriate health and safety regulations prior to use.
