Tekspro® 5116
Acrylic copolymer emulsion

Technical Data Sheet

Name: Tekspro® 5116
Revision Date: 2017-06-28

Product Description

Tekspro® 5116 is an anionic acrylic emulsion for the formulation of textile coating.

Properties

1. Soft handle
2. Excellent low temperature resistance.
3. Excellent yarn-fastness
4. Good water resistance.

*These properties are typical but do not constitute specifications.

Storage

Tekspro® 5116 should be stored in dry conditions above 5°C and below 35°C with the integrity of the packaging, and prevent direct sunlight. The validity of this product is for 6 months, performance assessment is recommended before use after shelf life. Tekspro® 5116 freezes at temperatures below 0°C and this will cause irreversible damage. The product should therefore be protected from freezing during storage. The technical properties of the emulsion may change as a result of storage time and storage conditions. This can lead to deviations from the given specifications. Skins can form during storage and transport of the dispersion due to its film forming nature. A filtration or sieve process is recommended before further processing.
Tekspro® 5116

Disclaimer: Wanhua Chemical Group Co., LTD. recommends that any customers of this material should check with Materials Safety Data Sheet (MSDS) for details about safely handling this material. We also suggest that you contact the suppliers of any other materials used in our recommended formulations and suggestions for appropriate health and safety regulations prior to use.
