**Tekspro® 5139**

Acrylic copolymer emulsion

**Technical Data Sheet**

Name: Tekspro® 5139  
NO.WHSM_5139  
Revision Date: 2019-05-16  
Version: 1.1

**Product Description**

Tekspro® 5139 is an anionic acrylic emulsion with excellent stiffness and toughness for textile coating. Neutralizer: ammonia water <1%. Biocide: CMIT/MIT=3:1 49ppm.

**Properties**

1. Excellent stiffness
2. Good water resistance

**Characteristic data**

*These properties are typical but do not constitute specifications.

**Storage**

Tekspro® 5139 should be stored in dry conditions above 5°C and below 35°C with the integrity of the packaging, and prevent direct sunlight. The validity of this product is for 6 months, performance assessment is recommended before use after shelf life. Tekspro® 5139 freezes at temperatures below 0°C and this will cause irreversible damage. The product should therefore be protected from freezing during storage. The technical properties of the emulsion may change as a result of storage time and storage conditions. This can lead to deviations from the given specifications. Lumps can form during storage and transport of the dispersion due to its film forming nature. A filtration or sieve process is recommended before further processing.

**Disclaimer:** Wanhua Chemical Group Co., LTD. recommends that any customers of this material should check with Materials Safety Data Sheet (MSDS) for details about safely
Teksp® 5139

handling this material.
