**Section 7 - HANDLING AND STORAGE**

**Control parameters**
The product does not contain any relevant quantities of materials with critical values that have to be mentioned at the workplace.

**Handling**
The precautions required in the handling of solvents must be taken. Ensure adequate ventilation and, if necessary, exhaust ventilation when handling or transferring the product. Explosion protection required.

**Storage**
The product will keep stable for twelve months when stored in its sealed original packaging at temperatures between 5°C and 35°C. Storage at temperatures below 5°C will make the product frozen and cause irreversible damage. The product should therefore be protected from freezing during storage. Temperatures higher than 35°C should be avoided in order to prevent the evaporation of water, which will result in the formation of a non-redispersible polymer film.

- **Hand protection:** Suitable materials for safety gloves; EN 374:
  - Butyl rubber – IIR: thickness >=0.5mm; breakthrough time >=480min.
  - **Recommendation:** contaminated gloves should be disposed of.
- Conditionally suitable materials for protective gloves; EN 374:
  - Nitrile rubber – NBR (>=0.35mm)
  - Breakthrough time not tested; dispose of immediately after contamination.
- **Eye protection:** Wear eye/face protection.
- **Body protection:** Wear suitable protective clothing.
